Robin Illingworth and Andrea Spice

Andrea and Robin are working together for a better De Parys!

Including: Better Pavements ✓ More Trees Planted ✓ Tackling Litter ✓

Good news on Tree Stumps!

Whilst out in De Parys, Robin and Andrea were pleased to see that the tree stump pictured below and in our last newsletter has now been removed.

Andrea and Robin reported this tree stump and are pleased to see that it has been removed and a new tree planted, along with many others in De Parys. However, they were then disappointed to turn a corner and find a brand new tree stump! For the majority of cases there is no reason for a tree stump to be left in this unsightly way, and Andrea and Robin will continue to work hard, reporting tree stumps as we find them.

Robin and Andrea will continue to liaise with the Borough Council to ensure that the stumps will be replaced by new trees if they were not removed for safety reasons.

Robin and Andrea successful with their request to have this stump removed

Unfortunately, another one was soon found

Looking after the Neighbourhood.

Andrea and Robin strongly believe that if you look after your neighbourhood and it looks nice then more people have respect for it.

Again, more good news resulting from the actions of Andrea and Robin.

Did you see the central barrier on Polhill Avenue that had been hit? The visual image was not a true representative of how De Parys ward should look?

Robin and Andrea did and straight away reported it. Andrea and Robin

are pleased to say that as a direct result of this the barrier has now been replaced. Ensuring the continuous safety of the many school children that cross there.

Robin and Andrea successfully had this railing replaced.

De Parys Conservatives - Caring For Our Community - ALL Year Round!

News from Your Local De Parys Ward Conservatives!

Andrea Spice and Robin Illingworth are concerned with the large puddles that form making pavements unusable.

With the wet weather upon us, have you noticed large puddles forming so you cannot walk along the pavement or cross the road?

Andrea and Robin have. These puddles are unacceptable and why should De Parys pedestrians have to put up with pavements they cannot use in wet weather?

The two biggest ones that Robin and Andrea have identified are on St Peters Street and on the corner of Goldington Road and Goldington Avenue.

Robin and Andrea have also witnessed school children attempting all sorts of dangerous ways to try and get past, and people with prams having to walk far out into busy roads to get by,

often when it is also dark. These have been reported, Andrea and Robin will press for a Council commitment to resolving what is an avoidable problem.

Local Policing Priorities in De Parys

Every quarter Bedfordshire Police host a Community Priority Setting Meeting, which is open to all residents in the area.

The most recent meeting was held on 4th December and the whole room agreed that the priority for the police over the coming quarter should continue to be **DRUGS**.

The representatives, including Sargent Luke Blackburn explained that drugs are often the cause

of many other crimes and so by focusing on this it will in turn eliminate many other crimes. They also stressed how important it is for us as residents to record with them any suspicious activity as this helps to build intelligence for their operations.

You can report it by phone on 101 or online at <https://www.bedfordshire.police.uk/report/Report>
Always in an emergency dial 999

STREETLIGHTS!

What do you think of the light from the streetlights?

Robin and Andrea have had many conversations with concerned residents about the lighting of streets as they are walking in De Parys which is more apparent now that it is dark so early.

This isn't always as you would think a 'late night' problem, many times this has been raised by those with young children walking home from school and being unable to see as the lighting does not illuminate the street very well.

Andrea and Robin have put in requests on particular streets to find out if the lighting can be brightened, or if it is at full brightness.
